

### **Equine under grad intern program**

Spring Session: Jan – Mid-May (Hosp & Repro) / Jan – End of June (Ambulatory)

Summer Session: Mid-May – July or later

### **Philosophy**

Peterson & Smith Equine Hospital is a full service equine practice in the heart of Ocala, Florida's beautiful horse country. Established in 1981, the clinic has grown to be one of the most highly recognized equine practices in the United States. We are always striving to remain a leading veterinary practice on an international level by providing state-of-the-art diagnostics, surgery and medicine for our patients and by fostering a relationship of professionalism and integrity with our clients. We provide a range of services from single patient management to large farm consultations. In addition to offering educational and practical work experience opportunities to students with an equine interest, we provide continuing education opportunities to both veterinarians and horse owners.

Our Undergraduate Intern Program was established in 2004. We are hoping to find students for our hospital (surgery/ medicine/ sports medicine), our equine reproduction center (ERC); and our ambulatory department (ambulatory students must commit to working from mid-January to mid-June). Although you may be exposed to all of the departments during your internship, you should expect to consistently work in only one of these areas. Spring internships will run from approximately mid-January through the mid-May. Summer internships run mid-May through mid-July.

The internship will concentrate on surgery, internal medicine, diagnostic imaging, theriogenology, emergency medical/surgical care, sports medicine, general medicine, and herd health. Students will receive training in basic handling and restraint, will develop a set of general veterinary technician skills including, but not limited to: preparing patients for procedures, surgical scrub, x-ray plate orientation, foal restraint, drawing up medications, administering medications, and monitoring patient's vitals.

It is our intent that this opportunity will fulfill the practical experience requirements necessary for each student's area of study, any personal goals that the students have for the internship and provide a realistic and relevant exposure to equine medicine.

### **Application Submission Deadline**

Applications and supporting documents for Spring and Summer session are due no later than **October 31<sup>st</sup>**. Selections and notification will be completed by November 26<sup>th</sup>.

### Student requirements:

- Enrollment in, or recently graduated from, an animal sciences, general agricultural/equine
- educational program or veterinary technician program.
- Must be at least 18 years of age
- Possess a valid driver's license and clean driving record
- Successfully pass a background and drug screening

### Student selection will be based on:

- Availability
- Relevant experience with a focus on horse handling skills
- Written references submitted with the application

### Schedule

- 12-hour shifts
- One day off a week
- Night shifts required for hospital and ERC internships
- Weekend shifts required
